Most Important Symptoms / Effects, Acute and Delayed:

Aspiration may cause pulmonary edema and pneumonitis. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

General Advice:

Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance.

5. Fire Fighting Measures

Suitable Extinguishing Media:

Water spray, fog, CO2, dry chemical, or alcohol resistant foam.

Unsuitable Extinguishing Media:

Do not use a solid water stream as it may scatter and spread fire.

Specific Hazards Arising From the Chemical:

Fire may produce irritating, corrosive, and/or toxic gases.

Special Protective Equipment And Precautions for Firefighters:

Call a physician or poison control center immediately. If swallowed, rinse mouth with water (only if the person is conscious). Do not induce vomiting. If vomiting occurs, the head should be kept low so that stomach vomit doesn't enter the lungs.

Firefighting Equipment / Instructions:

In case of a fire and/or explosion do not breathe fumes. Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from the fire area if you can do so without risk. Water runoff can cause environmental damage. Ventilate closed spaces before entering them. Keep run-off water out of sewers and water sources. Dike for water control.

Material Safety Data Sheet

Ghost Lime OG

Revision Date: 01/15/2020

Specific Methods:

Use water spray to cool unopened containers.

General Fire Hazards:

Static charges generated by emptying package in or near flammable vapor may cause flash fire.

6. Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures:

Keep unnecessary personnel away. Avoid contact with skin or inhalation of spillage, dust, or vapor. Do not touch damaged containers of spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Eliminate all sources of ignition.

Methods and Materials for Containment and Cleaning Up:

Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb with inert absorbent such as dry clay, sand, or diatomaceous earth, commercial sorbents, or recover using pumps. The product is immiscible with water and will spread on the water surface. Large spills: stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Prevent products from entering drains. Absorb in vermiculite, dry sand, or earth and place it into containers. Small spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills in original containers for re-use. This material and it's container must be disposed of as hazardous waste. Collect and dispose of spillage as indicated in section 13 of the SDS.

Environmental Precautions:

Prevent further leakage or spillage if safe to do so. Do not contaminate water. Avoid release to the environment.

Retain and dispose of contaminated wash water. Contact

local authorities in case of spillage to drain/aquatic environment.

7. Handling and Storage

Precautions for Safe Handling:

Do not handle or store near an open flame, heat, or other source of ignition. Take precautionary measures against static discharges. All equipment used when handling the products must be grounded. Avoid breathing vapor. Avoid contact with the eyes, skin, and clothing. Avoid prolonged exposure. Wash thoroughly after handling.

Conditions for Safe Storage, Including any Incompatibilities:

Keep the container closed. Handle containers with care. Open slowly in order to control possible pressure release. Store in a cool, well-ventilated area.

8. Exposure Control / Personal Protection

Occupational Exposure Limits & US. ACGIH Threshold Limit Values:

Material:

Specific chemical identities and/or exact percentage (concentration) of composition has been withheld as a trade secret.

Type:

TWA

Value:

20 ppm

Biological Limit Values: Appropriate Engineering Controls:

No biological exposure limits noted for the ingredient(s). Use explosion proof ventilation equipment to stay below exposure limits. Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should

be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Adequate ventilation should be provided so that exposure limits are not exceeded.

Individual Protection Measures, Such as Personal Protective Equipment:

Eye / Face protection wear safety glasses with side shields (or goggles). Face shield is recommended.

Skin Protection / Hand Protection:

Chemical resistant gloves.

Other:

Use of an impervious apron is recommended.

Respiratory Protection:

Respiratory protection not required. If ventilation is insufficient, suitable respiratory protection must be provided.

Thermal Hazards:

Wear appropriate thermal protective clothing, when necessary.

General Hygiene Considerations:

When using it, do not smoke. Keep away from food and drink. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking.
